every body reads a newspaper I use newspaper advertising regularly. When people pay for newspapers they read them carefully for all of the news that is interesting to them. When my ads are newsy and contain useful information I know that people will read them because they are news."

Another face that merchants like about newspaper advertising is that they can buy it on the basis of known values that are just as definite as the measures of weight and quality that apply to merchandise which they handle. Businessmen cannot afford to speculate with advertising. When they buy newspaper space they can make their investments on the strength o circulation facts and figures that are verified. Another face that merchants like about newspaper advertising is that they can buy it on the basis of known values that are just as definite as the measures of weight and quality that apply to merchandise which they handle. Businessmen cannot afford to speculate with advertising. When they buy newspaper space they can make their investments on the strength o circulation facts and figures that are verified. every body reads a newspaper I use newspaper advertising regularly. When people pay for newspapers they read them carefully for all of the news that is interesting to them. When my ads are newsy and contain useful information I know that people will read them because they are news."

Another face that merchants like about newspaper advertising is that they can buy it on the basis of known values that are just as definite as the measures of weight and quality that apply to merchandise which they handle. Businessmen cannot afford to speculate with advertising. When they buy newspaper space they can make their investments on the strength o circulation facts and figures that are verified. It is good business practice to buy advertising by such methods just as it is good business to buy and sell merchandise on the basis of known standards. This helpful information is

every body reads a newspaper I use newspaper advertising regularly. When people pay for newspapers they read them carefully for all of the news that is interesting to them. When my ads are newsy and contain useful information I know that people will read them because they are news."

Another face that merchants like about newspaper advertising is that they can buy it on the basis of known values that are just as definite as the measures of weight and quality that apply to merchandise which they handle. Businessmen cannot afford to speculate with advertising. When they buy newspaper space they can make their investments on the strength o circulation facts and figures that are verified.
